**ASPA's Connected Community** is 100% owned by ASPA and is a clinically Integrated Network (CIN) that is fundamentally different from any Accountable Care Organization (ACO), or CIN in Arizona. As a traditional ACO, ASPA Connected is a participant in the Medicare Shared Saving Program (MSSP). We are in the process of pursuing value-based contracts with AHCCCS, Commercial, and Self-Funded groups. ASPA Connected promotes the Appropriate Care Setting model. This means we always strive to treat patients in the lowest cost, appropriate care setting. We do not include hospitals in our Network. ASPA Connected is dedicated to:

- Patient care and patient satisfaction is optimized
- Quality measures and clinical outcomes are verifiably improved
- Hospital referrals are based on independent clinical judgement
- Payor cost are reduced significantly and physicians are rewarded accordingly
