

# YOU'RE INVITED!

## AN EVENING WITH EXTREMITY WOUND CENTERS & DR. RICHARD JACOBY

Discover why Extremity Wound is the premier provider of total wound care services in the area for your patients! Learn to identify patients who would benefit from wound care services, and how Dr. Jacoby's team helps to deliver both important health education and effective healing results, for a clean transfer back into your care.

### The D.I.C.E. Factor

**Diabetes, Infection, and Circulation of the lower Extremities** are some of the most costly CPT codes of the Medicare program. Dr. Jacoby has developed a comprehensive program to address this devastating clinical problem, and bring documented relief, healing and education to patients impacted by non-healing wounds.

## ABOUT DR. JACOBY

25 years ago, Dr. Richard Jacoby brought wound care services to the forefront in the Scottsdale area, when he personally assembled a group of physicians to establish a leading-edge, tech-savvy wound care clinic at the-then Scottsdale Memorial Hospital at the Osborn campus.

Dr. Jacoby trained with Lee Dellon MD Phd from Johns Hopkins and helped establish the Dellon technique for limb salvage and the surgical resolution of Peripheral Neuropathy. He additionally sought out the biological basis for nerve dysfunction with the help of John Cooke MD Phd at Stanford University .

Among other investigators from Harvard, UCLA, University of Missouri, Washington State University, to name a few, he authored the international best seller Sugar Crush, which was published in 2015 by Harper Collins and outlines Dr. Jacoby's solution to the Diabetes epidemic.

Jacoby is the medical director for Extremity Health & Wound Care Centers.

PLEASE JOIN US AT OUR NEWLY DEDICATED WOUND CARE CENTER TO BRING TOGETHER THE BEST IN PODIATRY, VASCULAR, INFECTIOUS DISEASE AND STEM CELL TECHNOLOGY TO ERADICATE THIS COSTLY, DEADLY DISEASE PROCESS IN A MUCH MORE COST-EFFICIENT OUTPATIENT SETTING.
