

# DB101

## Train-the-Trainers for Professionals

### Arizona Disability Benefits 101 (DB101)

Train-the-Trainer course is appropriate for vocational staff, rehabilitation counselors, employment coordinators and service providers. Lack of information or incorrect information is a barrier to employment and financial self-sufficiency for people who have disabilities. This training provides clear instructions on how to utilize DB101 to increase employment outcomes. The session will include how to access DB101 information on the rules governing SSDI/SSI, Social Security work incentives, Medicare, Medicaid, and employment impact on state/federal benefits, and other work related concerns. The training will address how to incorporate DB101 into service planning as billable and measurable outcomes that encourage and support people to consider, plan, and transition to employment. Upon completion of this 3-hour course, participants will display the competency to access and share the knowledge within DB101, including work-specific calculation sessions, with consumers and colleagues.
