

AT A GLANCE

NAVIS CLINICAL LABORATORIES®

Navis Clinical Laboratories® is focused on innovative, cutting-edge laboratory testing solutions that elevate whole-patient health care and support organizations and providers that treat substance use disorder, mental health conditions, chronic pain, and other acute and chronic diseases.

With a commitment to scientific expertise and exceptional support, we proudly serve customers nationwide, providing solutions that help reduce gaps in care, increase insight for better treatment decisions, improve patient safety and positively impact outcomes and lives.

ELEVATING PATIENT-CENTERED HEALTH CARE THROUGH PRECISION MEDICINE

POLYPHARMACY TESTING

Navis has developed a proprietary polypharmacy testing solution that targets more than 140 drugs and metabolites for prescription and over-the-counter medications to help identify potential nonadherence, contraindications and dangerous drug interactions for improved patient safety and outcomes.

Research Study: Closing the Medication List Gap

Navis and ASPA are conducting a co-authored research study to evaluate the impact of polypharmacy testing on medication adherence, reconciliation and patient safety.

ASPA is seeking participation from member practices. Findings will be analyzed collectively with the goal of preparing and submitting the results for peer-reviewed publication.

Practice administrators should email ASPASTudy@NavisClinical.com for more information. Please visit NavisClinical.com/ASPASTudy for a full study summary.
